year of free managed well care!

Call Miller Well Drilling today and let us help you tap into  
the potential of your groundwater!

**(800) 927-2997**

Individual Home: Fixed Price Guaranteed Water Program - MWD Will  
drill up to 400 ft. deep and either hydro-frac or drill deeper at our  
discretion to find the water that you need.

## **Why choose this option?**

We have greater incentive to find you water. After all, the deeper we drill the more you save. If steel casing or special remedies are required, we pay for the increased cost instead of you. Either way, you know exactly what you will pay up front even if we ended up needing to drill deeper to find adequate water for you. This option includes 1 full year for managed well care and warranty extended to cover labor.

## **What happens if we don't find water?**

**You pay nothing!**

## **With any other pay as you go plan you have significant uncertainty:**

1. With a price per foot you pay for the drilling regardless of the outcome.
2. With a price per foot your costs could vary based on casing materials and depth to bedrock.
3. Your pump system costs could vary based on the depth required to achieve water.
4. Although every Miller Well Drilling System carries a 5 year manufacturer's warranty on parts; you will have to pay for your own managed well care if you want to extend the warranty coverage to labor during the first year.
